CONSTRUCTION NEWSLETTER

Jefferson Parkway and TH 246 Roundabout

April 10, 2020

PROJECT START UP!

Welcome the TH 246 & Jefferson Parkway Roundabout Project! The Project is in the final planning stages, and minor small utility relocations are starting to begin. In the next few weeks, you will notice small utility crews will be working on-site to relocate electric lines, gas lines, communication lines and fiber optic lines. This work will also extend out into the neighborhoods adjacent to the project in order to relocate these utilities and ensure they are free and clear of the roundabout installation. These utility relocations are expected to last into May. In addition, the relocations are not expected to affect traffic flow in the intersection at this time. However, motorists can expect work to occur in the boulevard and ditch adjacent to the road. Brief closures of turn lanes and shoulders can be expected at this time. The City of Northfield reminds motorists to always drive with caution, slow down in work zones, and never enter a road blocked with barriers or cones.

A more detailed schedule will be distributed in the coming weeks, outlining the entire project schedule, and when to expect the intersection to be closed for construction.

PROJECT UPDATES

City of Northfield is encouraging residents to subscribe to construction updates by visiting ci.northfield.mn.us/notify and choosing “**TH 246 and Jefferson Parkway Roundabout**” from the list of available topics. Instructions on signing up for either email or text updates are at the top of the page.
